Q: Error 3355 while converting PC to Mac I need to convert a PC with Windows XP to a Macbook. I downloaded the free version of VirtualBox 4.1.2, Windows XP is installed there and I ran the command-line conversion process: sudo /Applications/VMware.app/Contents/MacOS/VMware convertfrompc "C:\test.iso" "\\server\c\$\Mac\VMware" It creates a new virtual machine but it gets stuck at the installation of the guest OS. After 10 minutes (or even 30) I get the following error: Conversion from PC to Mac failed. Error = 33554360 I have searched and tried some alternatives to convert from PC to Mac. sudo /Applications/VMware.app/Contents/MacOS/VMware convertfrompc "C:\test.iso" "\\server\c\$\Mac\VMware" I have also tried without any conversions, just a simple drag and drop. sudo /Applications/VMware.app/Contents/MacOS/VMware clonehd "\\server\c\$\Mac\VMware\test" "C:\test.img" sudo /Applications/VMware.app/Contents/MacOS/VMware convertfrompc "C:\test.img" "\\server\c\$\Mac\VMware\test" I have tried to change the permissions and ownership to everyone, same error. I have also tried a different conversion method and I get the same error (in the same timeframe). Are there any ideas to solve the issue? Is there a command to check the host file to see if the link is correct? Any other suggestion to solve the issue? A: I tried multiple options and I found this one. It works perfectly with the VirtualBox 4.1.2. The error is quite a bit more time-consuming than the process. But I don't think
